

Software to empower fleet management

A long-exposure photograph of a multi-lane highway at night. The road curves through a cityscape, with light trails from cars creating streaks of red, orange, and white. In the background, a dense urban skyline is visible under a dark blue night sky. A body of water is visible to the right of the highway.

OVERVIEW AND KEY FACTS

COMPANY

Established:
2002

Employees:
320+

HQ:
Vilnius

Offices:
Boston, Dubai, Tbilisi

Gurtam is a global developer of software solutions for fleet management and IoT. We deliver feature-rich and cost-effective products that empower fleet owners across various industries to optimize their business operations.

Gurtam product portfolio

Wialon

An ultimate platform for fleet management and IoT

flespi

A backend telematics platform for developers

GPS-Trace

A set of GPS tracking apps for personal use and small businesses

Being on the market for more than 20 years, Gurtam has acquired enormous expertise in telematics and has been actively expanding. Today, our products collectively track a total of 5+ million connected vehicles and other assets across 160+ countries, encompassing everything from passenger and cargo vehicles to stationary assets, animals, and people.

PRODUCTS

Software solutions for fleet management and IoT

Wialon

A universal fleet management and IoT platform for digitalizing and managing fleets of all kinds and sizes, from cars and bikes to heavy vehicles and machinery.

It offers both cloud and server versions and is compatible with 3,700+ hardware device models.

flespi

An API-first backend platform connecting any telematics hardware to various BI and telematics systems. It offers developers a unified interface for working with different types of IoT devices and data sources, enabling them to store, process, and visualize data.

GPS-Trace

A platform powering GPS tracking apps for individual users and small businesses. With its intuitive interface and comprehensive features, GPS-Trace is a valuable tool for enhancing fleet management efficiency and ensuring asset security.
